

WHO WE ARE . . .

Warwick in Bloom is an independent non-profit group of volunteers interested in beautifying our community.

One of our goals is to spearhead a town-wide effort, with the hope that all the communities in the Town of Warwick (the Villages of Florida, Greenwood Lake, Warwick; the hamlets of Amity, Bellvale, Edenville, New Milford, Little York, Pine Island, and Sterling Forest), will join us in entering the **America in Bloom** national competition in 2010.

We entered this same competition on behalf of the Village of Warwick in 2003 and won at that time!

We welcome your help! To volunteer your time, leave a message on our website:
www.warwickinfo.net/wib.

Donations in any amount are greatly appreciated and may be sent to: **Warwick in Bloom**, P.O. Box 519, Warwick, NY 10990. All funds are put right back into our community!

Special Thanks To . . .

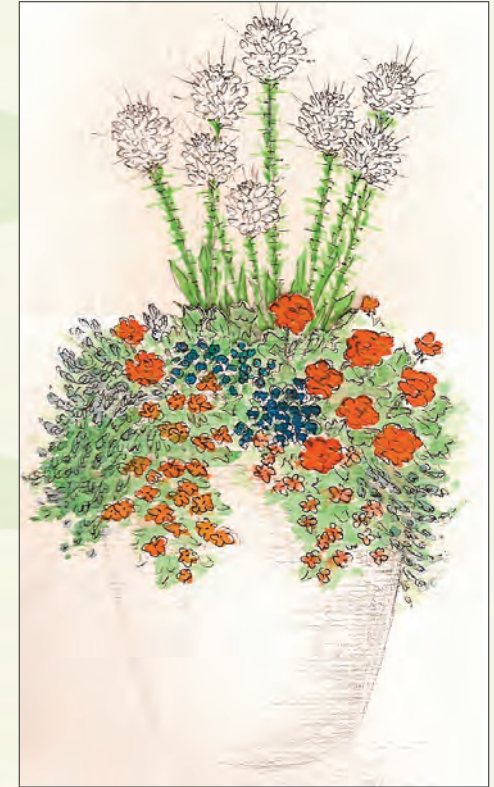

The community of Warwick, its many organizations, businesses and citizens who have donated financially to our cause, and to the volunteer members of **Warwick in Bloom** who have given their time and talents to beautify our downtown. *Click here* to view a list of our sponsors: www.Warwickinfo.net/wib/sponsors. We thank you all!

WARWICK IN BLOOM Presents

2009 PLANTING GUIDE Village of Warwick, NY

Vertical text: Hanging Baskets
Pelargonium x peltatum 'Bizzard White'
Pelargonium x peltatum 'Mandarin'

PLANTS OF THE YEAR

Calibrochoa 'Minifamous Orange' & 'Minifamous Apricot' - Million Bells

This small petunia-like flower is a prolific bloomer and is available in a wide range of colors. It's perfect for containers and hanging baskets. Best in full sun. Attracts hummingbirds! See it used in our summer street planters.

Pelargonium x peltatum 'Blizzard White' & 'Mandarin' Ivy Geranium

Ivy geraniums are among the "toughest" plants we know. They tolerate heat and need very little maintenance during the growing season. We highly recommend their use in hanging baskets.

Cleome 'White Sparkler'

Cleome 'White Sparkler,' also known as spider flower, is used as the centerpiece of our summer pots. Cleome tolerates extreme heat and is attractive to butterflies and hummingbirds. It's an ideal choice for the home garden in a full sun flower bed.

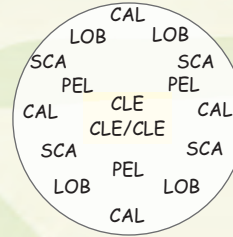

Bridge Planters

PEL - Pelargonium x peltatum 'Blizzard White'
 PEL - Pelargonium x peltatum 'Mandarin'

Main Street Summer Planters

CLE - Cleome 'White Sparkler'
 PEL - Pelargonium 'Rocky Mountain Orange'
